Key Word Index

A priori knowledge 699
Active suspensions 845
Actuator failures 459
Actuators 861
Adaptive control 75, 533, 679, 699, 709, 757, 781, 797, 899
Adaptive systems 7, 113, 401, 929
Algebraic system theory 293
Analytical redundancy 381
Approximation algorithms 401
Approximation theory 233, 333, 545, 985
ARMA models 721
Array processing 157
Artificial intelligence 85, 803
Automatic control 353, 405
Automatic gain control 679

Bayes methods 401
Bayes statistics 545
Bounded errors 887
Bounding ellipsoids 303
Brain models 739

Canonical form 585
Classification 1009
Closed loop systems 709
Cognitive systems 1025
Computational delays 619
Computer applications 85
Computer control 521
Computer testing 797
Computer-integrated manufacturing 611
Consistency analysis 63
Constrained systems 521
Continuous systems 23, 397
Continuous time systems 579
Control applications 215, 347, 353
Control system analysis 269
Control system design 585, 909, 963
Control systems 269
Control systems synthesis 709, 973
Control theory 425, 617, 963, 997
Controllability 425
Controller reduction 487
Controllers 233
Convergence 757
Convergence analysis 113, 533, 929
Coordination 833
Coordination structure 833
Correlation analysis 769
Correlation methods 125
Covariance function 125

Data acquisition 135
Dead beat control 475
Dead time compensators 637
Decentralized control 263, 499, 593, 789, 875, 1035
Decision theory 1009
Decomposition 593
Deconvolution 177
Decoupling 567, 585
Delay systems 333
Delayed control systems 903
Delays 425, 637
Design of jobs 429
Deterministic analysis 739, 929
Diagnosis 381
Diagonal dominance 789, 861
Differential geometry 545
Digital control 475, 915, 997
Digital control systems 557
Digital filters 579
Discrete systems 171, 619, 933
Discrete time systems 401, 421, 579, 607, 623, 915, 925
Distillation columns 567
Distributed parameter systems 739
Disturbance rejection 567, 607, 909
Division of labour 429
Doubly coprime fractional representations 405
Dynamic programming 521
Dynamic stability 215
Dynamic systems 389

Earthquake ground motion 721
Economic systems 933
Eigenvalues 215
Entropy 833
Estimation 113, 567
Estimation theory 607

Experiment design 195
Expert systems 459, 803, 1009

Failure detection 381, 459, 875
Fault diagnosis 459
Feed forward control 567
Feedback control 353, 521, 567, 709
Field tests 475
Flexible manufacturing 429, 611
Forecasting theory 633
Frequency domain 113, 405, 617, 633, 757
Function approximation 371
Functional analysis 781
Functional differential equations 321
Fuzzy control 513
Fuzzy logic 1025
Fuzzy set theory 1009

Gain and phase margins 499
Geometric theory 411
Geophysics 721

H^∞ approach 437
H^∞ optimization 617
Hankel-norm approximation 103
Heuristic programming 85
Hierarchical decision making 875
Hierarchical systems 1025
Higher-order statistics 51, 311
Human factors 429, 1009, 1025
Human performance 811
Hydraulic turbines 475, 557

Identifiability 177, 195, 739, 757
Identification 37, 63, 113, 157, 177, 195, 607, 629, 633, 651, 739, 757, 781, 803, 887, 925, 929
Identification algorithms 769
Identification techniques 23
Implementation process 429
Implicit systems 421
Industrial control 347
Infinite dimensional systems 333, 985
Input estimation 177

Instrumental variable method 63
Integral transforms 435
Integrated control system 903
Intelligent control 833
Intelligent machines 833
Interconnected systems 251, 263
Invariance 411
Isolability 381
Iterative methods 371

Kalman filters 875, 919

Laguerre functions 333, 985
Laplace transforms 333, 985
Large scale systems 593, 919, 1035
Large systems 789
Least squares estimation 63, 599, 607, 633
Linear algebra 417
Linear differential equations 63
Linear optimal control 499, 617
Linear optimal regulator 233, 487
Linear programming 887
Linear regulators 619
Linear systems 97, 171, 233, 303, 333, 405, 417, 421, 607, 709, 915, 925, 985
Linearization techniques 963, 973
Loop transfer recovery 487
Lyapunov equations 411
Lyapunov methods 933

M-matrix 1035
Machining 899
Man-machine systems 429, 611, 811, 1009
Management systems 429
Manufacturing processes 611
Membership set 887
Mental load 811
Minimum variance control 633, 691
Model following 949
Model parameterization 699
Model reduction 103, 215, 233, 251, 333, 361, 475, 487, 985
Model validation 125
Model-based approach 157
Modelling 135, 195, 475, 557, 803
Models 651
Multirate control systems 377
Multivariable control systems 437
Multivariable predictors 75
Multivariable systems 171, 293, 405, 417, 757

Near optimal control 263
Neurophysiology 739
Noncausal autoregressive models 51, 311
Nonlinear control systems 353, 513, 567, 679, 963, 973
Nonlinear filtering 401
Nonlinear process 651
Nonlinear programming 371
Nonlinear systems 353, 499, 899, 997
Nonparametric and parametric models 23
Nonstationarity analysis 721
Numerical methods 371

Observability 421
Observer controller compensator 1035
Observer design 903
Observers 321, 411, 459, 789, 997
On-line operation 521
Optimal control 361, 389, 435, 573, 593, 679, 845, 949
Optimal experiment design 37
Optimal filtering 389, 397
Optimal predictors 75
Optimal state estimation 397
Optimization 371, 437, 521
Order estimation 157
Orthonormal functions 781
Output feedback 321
Overlapping decomposition 593

Parameter estimation 37, 51, 63, 97, 125, 135, 167, 171, 195, 293, 401, 533, 545, 599, 607, 721, 739, 757, 769, 803, 875, 887, 925
Parameter optimization 909
Parity equations 381
Partial differential equations 435, 739
Participation 611
Pattern recognition 797
Periodic systems 377
Perturbation techniques 919
Perturbations 283
Petri net language 833
Petri net transducer 833
pH control 781
PI-control 475
PID control 513, 797
Pole placement 377, 573
Polynomials 405, 949
Power generation 135
Power station control 475, 557
Power system control 215
Prediction 75, 949
Prediction error methods 125
Predictive control 75, 691, 781, 915
Process control 347, 557, 691, 781, 915
Production control 611
Psychological methods 1025
Pulp and paper 629
Pulp industry 347, 781

Random process 103, 435
Range estimation 157
Rapid sampling 167
Recursive algorithms 7, 545, 887
Recursive estimation 103, 401, 925
Recursive least squares 929
Reduced-order observers 405
Redundancy 459
Regulator 585
Relay control 691
Reliability 459
Robotics 833
Robots 861
Robust control 269, 303, 347, 353 475, 709
Robust stability 1035
Robust stability analysis 623
Robustness 113, 269, 283, 303, 401, 437, 459, 499, 607, 637, 781, 903, 933
Root locus 283

Sampled data systems 167, 377, 425, 545, 573, 637, 997
Saturation control 899
Self-adapting systems 1009
Self-tuning predictors 75
Self-tuning regulators 293, 533, 781
